

RTS VideoLink

The RTS VideoLink is an analog wireless video transfer system, specifically aimed towards maritime and offshore operations. The VideoLink is easy to mobilize and operate, and features excellent range.

The system consists of

- RTS VideoLink unit
- Omni or Directional antenna

Features

- Easy to operate
- Multi-channel operation
- Omni configuration range: 3–5 km
- Directional configuration range: 10-15 km
- Also available in EX enclosure

Technical specifications

- Centre frequency: 2,2135 Ghz and 2,0385 Ghz
- Output transmission power: 0,5 W on transmitter
- Bandwidth: 14 Mhz
- Video input/output: Nominal 1 Vpp composite video signal
- Power requirements: 110/220 VAC on transmitter and receiver
- VideoLink Dimensions: 260 x 300 x 120 mm / 4,2 kg
