

# Dynaset HPW220

## Dynaset HPW220

The Dynaset HPW high pressure water pump transforms the hydraulic power of a work machine effectively into high pressure water power. Small size, light weight and durable construction make the HPW pump very cost effective. The HPW pump is an excellent tool in daily cleaning work and other works, where reliable high pressure water is needed.

### Main features

- Double turbo nozzle
- Easy integration
- Can be used for seal testing on request
- Full ocean depth rated
- Modified for subsea

### TECHNICAL SPECIFICATIONS

<b>Hydraulic Interface</b>	To run the pump	2 x JIC12
	Compensator	1 x JIC4
	HP Water	1 x JIC6
<b>HP Water</b>	220 bar	
	50 l/min	
	Dual rotating nozzle	
<b>Hydraulic Requirement</b>	70 l/min @ 200 bar
