

# Dynaset HPW220

The Dynaset HPW high pressure water pump transforms the hydraulic power of a work machine effectively into high pressure water power. Small size, light weight and durable construction make the HPW pump very cost effective. The HPW pump is an excellent tool in daily cleaning work and other works, where reliable high pressure water is needed.

## Specifications

<b>Product</b>	Dynaset HPW220
<b>Country of origin</b>	Finland
<b>Manufacturer</b>	Dynaset

## Main features

- Double turbo nozzle
- Easy integration
- Full ocean depth rated
- Modified for subsea
- Can be used for seal testing on request

## Hydraulic interface

<b>To run the pump</b>	2 x JIC12
<b>Compensator</b>	1 x JIC4
<b>HP Water</b>	1 x JIC6

## HP Water

<b>HP Water</b>	220 bar 50 l/min Dual rotating nozzle
-----------------	---

## Hydraulic Requirement

	70 l/min @ 200 bar
--	--------------------
