

Sonic 2024 ROV Bracket

Main features

- Tailored for ROV use
- Rugged and compact design
- Easy, fail-safe sonar mounting
- Easy bracket mounting on ROV
- Protected encapsulation
- Turbulence reducing design
- Compatible with all 2024 models
- Customised transit case

RTS and Invento Team have developed an ROV bracket for R2Sonic Sonic 2024 sonar systems. The purpose of the design is to reduce mobilisation time and mounting errors, as well as providing added protection for a key component in an ROV survey spread. The unit also features protected predetermined cable paths, minimal mounting points and a turbulence reducing design. To allow for safe transport and minimal assembly on site, a customised case is offered where the sonar can be shipped ready mounted in the bracket.

Specifications

Product	Sonic 2024 ROV Bracket
Country of origin	Norway
Manufacturer	Rental Technology & Services AS

Technical specification

Environmental Weight in air Weight in water	12 kg ca. 10 kg
Dimensions (mm) Outer	535mm x 542mm x 248mm
Materials	Aluminium, POM, PE
