

MetSTAB XL

Main features

- High precision
- High repeatability
- Locking mechanism
- Bronze guide pins to avoid cold welding
- Replaceable guide pins
- Robust construction

High-precision Metrology Stab for subsea applications

The MetStabXL has the same high precision interface solution as the MetStab but with an increased diameter which allows for larger and heavier modules to be integrated without compromising the accuracy of the stab. The male and female stab can be easily locked and unlocked using the ROV handle. The MetStabXL allows for very little angular and rotational movement making it the perfect choice when integrating high precision subsea sensors.

Specifications

| | |
|--------------------------|---------------------------------|
| Product | MetSTAB XL |
| Country of origin | Norway |
| Manufacturer | Rental Technology & Services AS |

Technical specification

| | Male stab | Female stab |
|-------------------|--|----------------|
| Weight | 12.95 kg | 11.5 kg |
| Dimensions | 52mm x Ø 350mm Total height when assembled = 80mm | 60mm x Ø 350mm |
