

Lizard Shark HD

The Lizard SharkHD by Imenco is a compact Pan/Tilt/Zoom subsea camera built for the ROV market, rated to 1,000msw. Its 10x optical zoom, built-in dimmable LED lights, and slim 90mm diameter make it ideal for inspecting hard-to-reach areas that conventional equipment can't access.

Designed to save time during operations and critical decision-making, the Lizard SharkHD is especially effective for inspecting sealing surfaces before hookups. It can be controlled using an ROV manipulator arm with a removable fish tail-grip.

Specifications

Product	Lizard Shark HD	Housing	Titanium
Country of origin	Norway	Dimensions	Ø 90 / 296 mm
Manufacturer	Imenco AS	Resolution	1080p @60fps
Tilt / Pan angle	270° - 350°	Weight	4.2 kg
Integrated LED light	4 x 3W LED dimmable	Depth rating	1,000 msw
Field of view	49°wide - 5° tele	Power	18 – 36 VDC
Optical zoom	10x	Output format	3G / HD-SDI
