

# REN ROV Dredge

## 10 inch

RenOcean ROV Dredger is designed and built with focus on high performance, lightweight and easy interface for the clients. The one box dredging package comes in one unit with all included. The highly efficient dredger is supplied ready to be mounted on to the ROV for quick and easy operation. RenOcean ROV Dredger series require low hydraulic flow and pressure. This allowing greater flexibility regarding the size of the vehicle the dredger can be used with. RenOcean offers the most powerful and light weighted dredges on the market with extreme capacity and high flexibility.
