

# 5 Station valve pack

## Features and benefits

- Graphical user interface design can be customised for a wide range of applications.
- Closed or open loop control, data logging and custom control interfaces can be added to the system
- Scaling valve size and type provides a simple and rugged function while maintaining compact and light weight form

The 5 Station Intelligent Valve Pack can be configured to meet many requirements. The pack is designed and built to operate our smart torque tool, but can also be configured for other tooling requirements including flots and custom multi-functional tool.
